

*TA Chemistry AB will market products for surface treatment of stainless steel with a focus on the more environmentally friendly and safer NOX-free pickling bath.*

*We will deliver high quality products with a high degree of flexibility in terms of volumes and package sizes.*

*We prioritize quickly and on time deliveries and will maintain our tradition of delivering to a very high level of delivery security.*

*Our responsibility is to conduct business with long-term recycling thinking within the framework of what is technically, economically and ecologically possible.*

*Each employee has their share of responsibility for environmental and quality work. Through information and training, each employee must learn to take responsibility for the environmental issues that are important to the business.*

*Our environmental and quality work must be focused on continuous improvement.*

*We must comply with laws and regulations and avoid spills and pollution of air, soil and water by analyzing risks and developing routines for safe handling of the chemicals we use in our operations.*
